

PRODUCT LINE: Dead Blow Hammers (Standard)

ITEM #:	WEIGHT [OZ/LBS/KGS]	HANDLE LENGTH [IN/MM]	OVERALL LENGTH [IN/MM]	STRIKING FACE DIAMETER [IN]	HEAD LENGTH [IN]	UPC#	WHERE TO BUY
ABC2DB	26 oz/1.6 lbs/0.74 kg	10.5"/267mm	12.75"/324mm	2.00"	4.125"	855707004420	BUY NOW
ABC3DB	45 oz/2.8 lbs/1.28 kg	12"/305mm	14.375"/365mm	2.25"	4.625"	855707004437	BUY NOW
ABC4DB	53 oz/3.3 lbs/1.50 kg	12.5"/318mm	15.25"/387mm	2.75"	5.375"	855707004444	BUY NOW

PRODUCT LINE: Dead Blow Hammers (Sledge)

ITEM #:	WEIGHT [OZ/LBS/KGS]	HANDLE LENGTH [IN/MM]	OVERALL LENGTH [IN/MM]	STRIKING FACE DIAMETER [IN]	HEAD LENGTH [IN]	UPC#	WHERE TO BUY
ABC7DB	88 oz/5.5 lbs/2.49 kg	16.5"/419mm	20"/508mm	2.75"	7"	855707004451	BUY NOW
ABC10DB	144 oz/9.0 lbs/4.08 kg	26"/660mm	30"/762mm	2.75"	7"	855707004468	BUY NOW
ABC12DB	168 oz/10.5 lbs/4.76 kg	26"/660mm	30"/762mm	3.25"	8"	855707004475	BUY NOW
ABC14DB	192 oz/12.0 lbs/5.44 kg	32"/813mm	36"/914mm	3.25"	8"	855707004482	BUY NOW

FEATURES AND BENEFITS

HOT CAST POLYURETHANE CONSTRUCTION

Our dead blow hammers are a one piece, hot cast polyurethane construction, engineered to perform better and outlast rawhide, rubber, lead and other plastic type hammers by 10-20 times. Utilizing the benefits of urethane technology, no other plastic or rubber materials currently used can result in a stronger, longer lasting dead blow hammer.

STEEL SHOT FILLED CANISTER

Steel shot filled canister creates a dead blow effect for sustained impact, maximum force and power, reduces or eliminates rebound and absorbs the shock on impact. The free flowing shot concentrates the intensity of the hammer strike and increases striking force by up to 40 percent. It also absorbs the blow minimizing bounce back, reducing fatigue and the risk of injury, and improving productivity.

POLYURETHANE CONVEX STRIKING FACE

Convex faces on heads resist chipping, splitting and are cut resistant. They are designed to withstand severe striking applications. The heads provide a non marring contact surface that eliminates or minimizes denting, marring and damage to struck objects.

STEEL REINFORCED POLYURETHANE HANDLE

Handles have a heat treated steel reinforced rod that provides added strength and safety by resisting breaking on overstrikes. The handle is fully encased in hot cast custom formulated polyurethane. The comfort design handle absorbs shock, ensures comfort and has a slip-resistant grip along with a flared end which helps prevent the hammer from slipping.

NON-SPARKING, NON-MARRING AND CHEMICAL RESISTANT

Our dead blow hammers are completely encased with unique polyurethane which eliminates any exposed metal making them spark-resistant for safe use near combustible materials. This specially formulated polyurethane resists most oil, solvents and chemicals. They are also non-marring making them the perfect tool for virtually any hammering application.

HIGH VISIBILITY

High visibility "Red" color makes them easier and quicker to spot on the job.

MADE IN THE USA

All ABC Hammers are proudly made in the USA.

Pound for Pound, the World's Greatest Hammers.
